VISION & MISSION

VISION

Aspire to become an Excellent Corporation through Professional People, Solid Finance, Sustainable Growth, and Customer.

MISSION

To organize and develop effort of exploration, exploitation, and support services in energy and resources with technological innovation, and commitment in Quality, Safety, Health.

COMPANY OVERVIEW

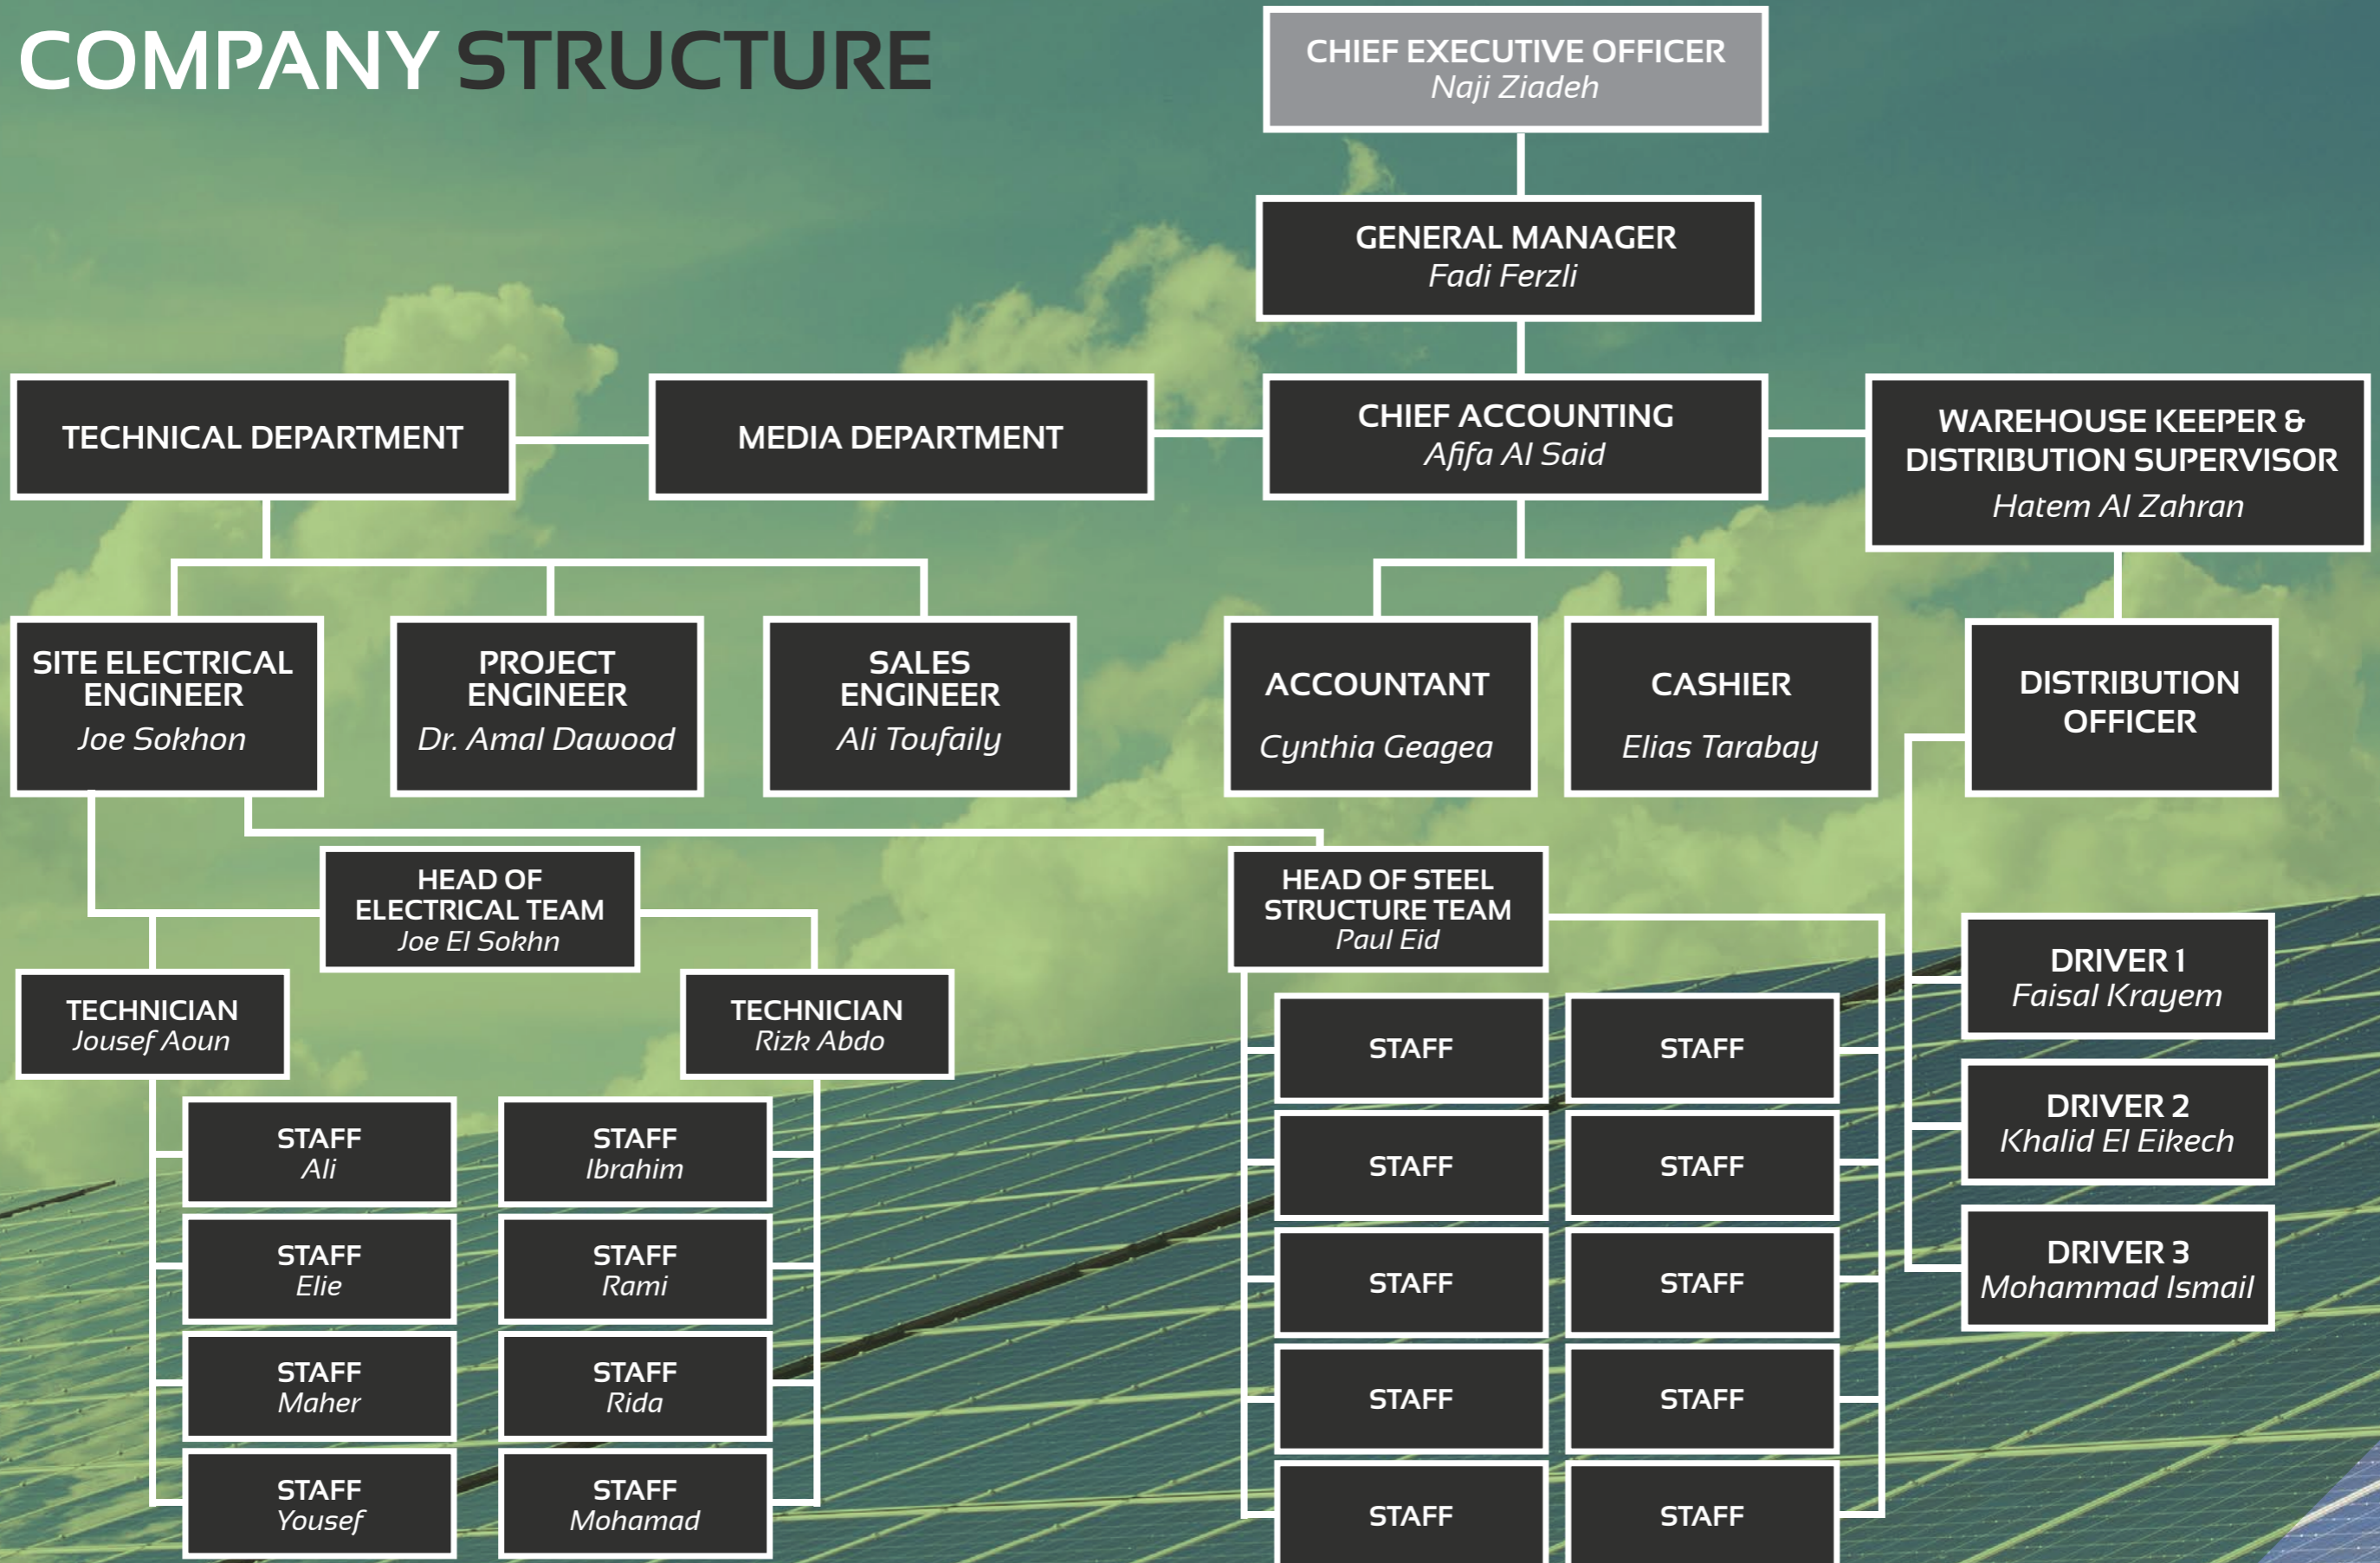

ZTC started a humble journey in 2013. Through our relationship with international companies and our technical partners, we became distributors of Solar Systems and specialists in the design and supply of photovoltaic power sources and back-up systems for a wide range of applications. Backed by a skilled team and under experienced leadership, within a decade, we have supplied, installed, commissioned and serviced many solar power projects of all sizes.

ZTC has an innovative range of solar products including PV, inverters, modules, structures, and complete balance-of-system, ensuring the best coverage for projects of all scales. ZTC now have years of expertise and in-house engineering capabilities to provide clean energy solutions that are feasible, cost-effective and innovative.

ZTC provides a smart and sustainable alternative to constantly rising energy rates by upgrading your home, commercial enterprises, industry and community insulation and installing the most environmentally friendly energy, efficient solutions.

Our team of over 30 skilled employees, including experienced engineers, project managers, and technicians, ensures that each project is executed with the utmost professionalism and care. Whether it's a small residential setup or a large-scale commercial project, ZTC ensures seamless execution from design to installation and maintenance. With a decade of expertise, we are committed to helping businesses and communities embrace renewable energy and reduce their carbon footprint.

COMPANY STRUCTURE

CUSTOMER & BUSINESS PARTNERS

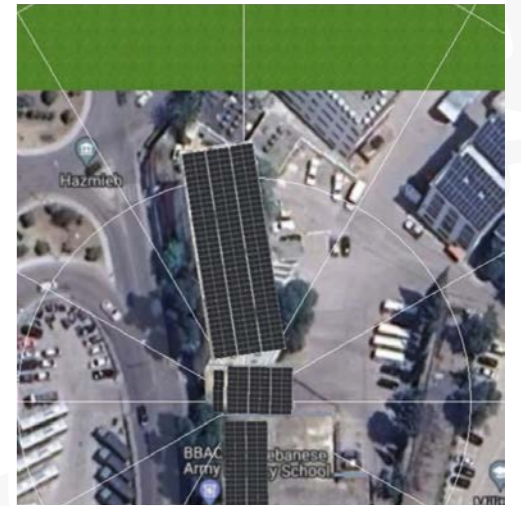

700 MW of Solar Systems and 500 MWh Energy Storage: Over the years, ZTC Technology has successfully completed numerous projects, totaling 700 MW of solar power generation and 500 MWh of energy storage.

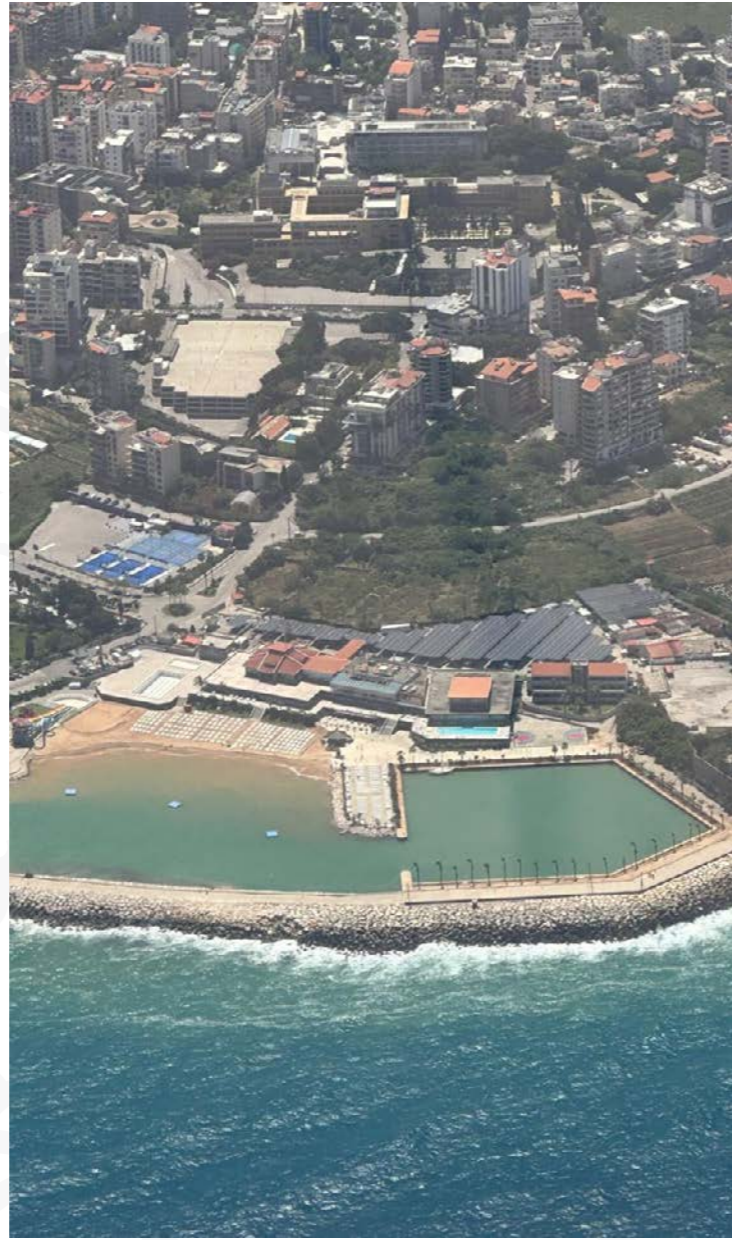

These large-scale systems have been deployed across a wide range of sectors, including residential, commercial, and industrial applications. Our solutions are designed to deliver reliable, sustainable energy, reduce costs, and support long-term energy independence for our clients. Whether optimizing energy usage for a large commercial facility or providing clean, off-grid power to remote locations, our projects consistently meet the highest standards of efficiency and reliability.

Our Clients: ZTC Technology is proud to have partnered with a diverse range of prestigious clients, including the Lebanese Army, ICRC, ISF, CMA CGM, L'Abeille D'Or, Canadian Army, Home City, Lovotel, SOS Lebanon, and many others. Our extensive portfolio spans various industries, showcasing our ability to customize solutions to meet the unique needs of each client.

From delivering reliable on-grid and off-grid systems to designing bespoke energy storage solutions, ZTC Technology remains a trusted partner in providing cutting-edge renewable energy solutions.

International Studies and Expansion: In addition to our regional projects, ZTC Technology has extended its expertise globally. We have conducted several comprehensive energy studies outside Lebanon, particularly in Africa, covering 20 GB of energy requirements. These studies support the growth of sustainable energy infrastructure across the continent and contribute to the global transition to renewable energy in emerging markets.
